Conclusion

NightDoge token contract has been audited and it can be used in production.
NYTDOGE ownership has been renounced.

The token deployer placed all the supply with 2,900,000 PLS on NYTDOGE-PLS liquidity pool

Transaction: <https://scan.pulsechain.com/tx/0xd1d55c39b50ca6dc06a021531b-30b059a9cb61057cb0529b16cd756bb44d3441>

Liquidity pool creator burnt all the PLP needed to claim back the liquidity, doing so, a rug-pool can't happen as the token deployer can't remove the liquidity.

NYTDOGE doesn't have any fee on transfers and any kind of restriction or any owner privilege.

This report represents an extensive assessing process intended to help our customers increase the quality of their code while reducing the high level of risk presented by cryptographic tokens and blockchain technology.

Blockchain technology and cryptographic assets present a high level of ongoing risk. SnipeFinance.com positions that each company and individual are responsible for their own due diligence and continuous security. SnipeFinance.com goal is to help reduce the attack vectors and the high level of variance associated with utilizing new and consistently changing technologies, and in no way claims any guarantee of security or functionality of the technology we agree to analyze.

The analysis of the security is purely based on the smart contracts alone. No applications or operations were reviewed for security. No product code has been reviewed.
